

DoublebaseTM Once

Presentation: White opaque gel.

Uses: An advanced, highly moisturising and protective emollient gel for regular once daily use in the management of dry skin conditions such as eczema, psoriasis or ichthyosis. May also be used as a soap substitute and as an adjunct to any other emollients or treatments.

Directions: All age groups. Apply direct to dry skin once daily or as often as necessary. Can be used as a soap substitute for washing. If applying another treatment to the same areas of skin, apply treatments alternately leaving sufficient time to allow the previous application to soak in.

Contraindications, warnings, side effects etc: Do not use if sensitive to any of the ingredients. Doublebase Once has been specially designed for use on dry, problem, or sensitive skin. Rarely skin irritation (mild rashes) or allergic skin reactions can occur on extremely sensitive skin, these tend to occur during or soon after the first few uses and if this occurs stop treatment.

Instruct patients not to smoke or go near naked flames. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a potential fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

Ingredients: Isopropyl myristate, liquid paraffin, glycerol, steareth-21, macrogol stearyl ether, ethylhexylglycerin, 1,2-hexanediol, caprylyl glycol, povidone, trolamine, carbomer, purified water.

Pack sizes and NHS prices: 100g tube £2.69, 500g pump pack £6.99.

Legal category: Class I medical device.

Further information is available from: Dermal Laboratories Ltd, Tatmore Place, Gosmore, Hitchin, Herts, SG4 7QR, UK.

Date of preparation: August 2025.
